Innovation in Adhesive to Bond Sinks to Countertops

DeCara Inc. , leader in manufacturing DC Dynamis epoxy resins and adhesives, is highly recognized worldwide for its most advanced and high performance epoxy formulas that offer high quality results.

After months of tests, DC Dynamis finally releases its latest adhesive compound, the **SOLID SURFACE EPOXY BONDING COMPOUND**. This adhesive is an affordable and user-friendly epoxy that bonds sinks and cabinets to counter tops made of granite, Corian, stone, ceramic, and other products.

Venice, FL, June 20, 2010 – Dc Dynamis introduces its latest innovation in epoxy adhesives. The **SOLID SURFACE EPOXY BONDING COMPOUND (S.S.E) Type I & Type II**, will bond to all clean, structural sound materials (except aluminum and plastic). The **SOLID SURFACE EPOXY BONDING COMPOUND** is ideal for the installation of ceramic, granite or metal sinks or wood cabinets, with countertops made of granite, Corian, wood,or stones. This latest epoxy is user-friendly and can be used easily in the renovation of kitchen, bathroom, washroom, or outdoor countertops.

The **SOLID SURFACE EPOXY BONDING COMPOUND** is a no-blush epoxy, easy to mix that does not creep. The pot life of this adhesive varies from 60-75 minutes in a 100 grams mass for Type I to 5-10 minutes in a 100 grams mass at 75°F for Type II. This epoxy bonds extremely well to many surfaces and can be painted. The **SOLID SURFACE EPOXY BONDING** is not recommended for aluminum and plastic.

The **SOLID SURFACE EPOXY BONDING COMPOUND** is used by industrial companies, professionals, and builders for its high quality agents and is available in large kit size. Dc Dynamis offers the **SOLID SURFACE EPOXY BONDING COMPOUND** in smaller kit starting at 1 Quart for under \$20.00. A quart is sufficient to do a 1 time application and can be used multiple times.
