Revolutionary Epoxy Solution for Fiberglass Glass Repair

Dc Dynamis, epoxy manufacturer based in Florida, introduce DYNAPOX® EPOXY Fiberglass Repair Kit to complete its already well known and recognized line of boat repair epoxy line. DYNAPOX® EPOXY solution is composed of unique agents that produce a much stronger finish fiberglass. It is highly resistant to fresh water and salt water in tidal, splash or weather zones.

Venice, FL, September 10, 2009 – Dc Dynamis releases DYNAPOX® EPOXY, an epoxy solution made of a unique combination of agents that is developed to be resistant to fresh and salt water. DYNAPOX® EPOXY is formulated for repairing molded fiberglass body panels to which traditional epoxy resin will not adhere or resist salt water.

DYNAPOX® EPOXY unique formulation is specifically developed to repair boats, personal watercrafts, jet skis, surfboards, water skis, canoes, and kayaks. DYNAPOX® EPOXY is offered as a convenient kit for less than \$50. The Epoxy repair kit contains everything needed to make a fiberglass repair; including but not limited to cloth, spatula, paintbrush, resin, putty, mixing cups, spreader and simple step-by-step instructions for making repairs. “Our high success with our epoxy line for the boat industry enticed us to develop a kit that is easy for boaters and sea lovers to take with them in their tool and repair kit” says John Caramanian, President of DeCara, Dynamis. The epoxy, adhesive and coating line includes many products that are easy to apply, chemical resistant, sagging free, and weather resistant. Dc Dynamis product line is continually expanding. Dc Dynamis also offer custom formulation if products are not currently available. Many colors and pot life are available to fit any needs.
